

Inspection Report

Santa Cruz Biotechnology Inc.
2145 Delaware Avenue
Santa Cruz, CA 95060

Customer ID: 1344

Certificate: 93-R-0380

Site: 002

SANTA CRUZ BIOTECHNOLOGY, INC.

Type: ROUTINE INSPECTION

Date: Sep-10-2013

3.127

FACILITIES, OUTDOOR.

Sec. 3.127 Facilities, outdoor.

(a) Shelter from sunlight. When sunlight is likely to cause overheating or discomfort of the animals, sufficient shade by natural or artificial means shall be provided to allow all animals kept outdoors to protect themselves from direct sunlight.

Several hundred goats kept in the H7 barn area had insufficient shade to protect themselves from direct sunlight at 13:15 hours. The temperature in the sun was 90.2 F at the time. One group of goats was observed to have no shelter. A second group of goats was being kept in a paddock with one shade structure. The one shade structure in the paddock did not provide sufficient shade for all of the animals. Goats were observed crowded under all the shaded areas.

The local climate during the summer is consistently hot with abundant sunlight. Excessive exposure to direct sunlight may lead to overheating or discomfort of the animals. The facility should ensure that sufficient shade is provided to allow all animals kept outdoors to protect themselves from direct sunlight.

Corrected at the time of the inspection.

An exit briefing was conducted with a facility representative.

This inspection was focused on housing at the H6 and H7 barns.

Accompanied by Dr. Pam Smith.
